

Statement regarding the compliance of Pulsar Plus with UK safety standards

To our distribution Partners and certified Installers :

WallBox Chargers S.L hereby states that the following product:

- Brand: Wallbox
- Model: Pulsar Plus
- PN: PLP1-X-X-X-E-XXX-X

complies with the safety objectives set out in the following standards:

- BS 7671:2018+A1:2020

The safety functionalities of the Pulsar Plus, which have been developed for the UK market, have been tested by a third party laboratory (APPlus) and it was deemed compliant specifically in relation to clause 722.411.4.1 of standard BS 7671:2018 +A1:2020.

One of the components used in Pulsar Plus is certified by standard IEC 61095, instead of standard IEC 60947-4-1. Nonetheless, the Pulsar Plus meets all safety objectives established by IEC 60947-4-1. As such, we are confident that the Pulsar Plus is entirely safe and complies with the safety objectives of standard BS 7671:2018+A1:2020.

We acknowledge that we remain liable for any hardware-related safety failure when the Pulsar Plus has been installed in accordance with the standard BS 7671:2018+A1:2020 and the official instructions provided by Wallbox in the Pulsar Plus installation guide.

Sincerely,

Eduard Castañeda, Chief Product Officer

Barcelona, 25th of June 2020.
